## Formal Qualification

**2001** – **Masters** degree, Slovak University of Technology, Faculty of Electrical Engineering and Information Technology, Bratislava, Slovakia

**1999** – **Bachelor** degree, Slovak University of Technology, Faculty of Electrical Engineering and Information Technology, Bratislava, Slovakia

## Relevant Experience and Skills

### Technical communication

- Very good written and spoken (English) communication skills.
- Project manager.
- Team leader/player.
- Project analysis and consultancy on IT matters.
- Generation of a broad range of technical (specifications, drafts, technical analysis) and end-user (user's manuals) documents.

### Computer related

- Excellent working knowledge of the Internet. I specialize on everything related to latest trends in Internet related technologies.
- W3C standards based web design (XML, XSLT, XHTML, CSS, WAI, etc.).
- Very good at applying software design practices (design patterns, OO, UML, extreme programming, unit testing).
- Six years of working experience with PHP (version 3, 4, 5). I write code according to coding standards and using PEAR for packaging and deployment.
- Basic or intermediate knowledge of Java, JavaScript, AJAX, Perl, Python, Visual Basic for Application and Mono (.Net).
- Creation, working, maintaining and customisation of content management systems (CMS), shopping carts and integration with payment systems.
- Automated data processing (ie. Internet surveys, backend and payment systems).
- Design and implementation of user interfaces for both Internet and desktop.
- Excellent code documentation skills.
- Easily adoptable to new programming languages.
- Knowledge of SQL and experience in using PostgreSQL, MySQL, SQLite and InterBase databases.
- Working experience with version control software (CVS, SubVersion).
- Graphical skills and experience in using image manipulation (Photoshop, The

- GIMP) and various vector graphics programs.
- Familiar with dozens of programs (ie. Macromedia Dreamweaver, Borland Jbuilder, Eclipse, Sybase Power Designer, MATLAB, MS Office, OpenOffice, etc.)
  - Linux and Windows installation and administration on both server and desktop.
  - Administration of web servers (Apache, Tomcat).

## **Relevant Employment History**
